

PowerFlush 2320

1.5 Kw 23 LPM With Pall UR319 20 Inch housing PowerFlush 2320

The rugged PowerFlush 2320 has been developed over many years and refined through real life field operation.

Ideal for small flushing operations with viscosities up to 2300 cSt with a single phase motor, higher viscosities are permissible when a three phase motor is used.

Typical applications

Lubrication and hydraulic system flushing for mobile equipment and fixed plant flushing.

STANDARD SPECIFICATION

(options and customisation available)

Type	Powered Filter Cart
Model	FC1P1.5kW023EG319-20
Dry weight (without hoses)	110kg
Dimensions	Rectangular dimension... Height 1200 mm Width 400 mm Front to back depth 250 mm
Capacities	Flow 23LPM
Viscosity	2300 cSt
Maximum discharge pressure	7 Bar
Inlet connection	1" BSPTM
Outlet connection	3/4" BSPTM
Power cord connection	Standard 10 amp 3 pin plug
Electrical IP rating	Motor, switch and junction box are all IP66 rated.
Electric motor	1.5 Kw 4 pole IP66 single phase
Electrical overload protection	Yes
Filter housing	Pall UR319 20 inch
Filter element	Specify when ordering
Pump	23 LPM external gear pump
Safety relief valve	Integral in Viking Pump, set at 7 Bar
Differential pressure gauge	Colour coded (to indicate filter replacement)
Wheels	Heavy duty 10 inch rubber with sealed ball bearings

PowerFlush 2320

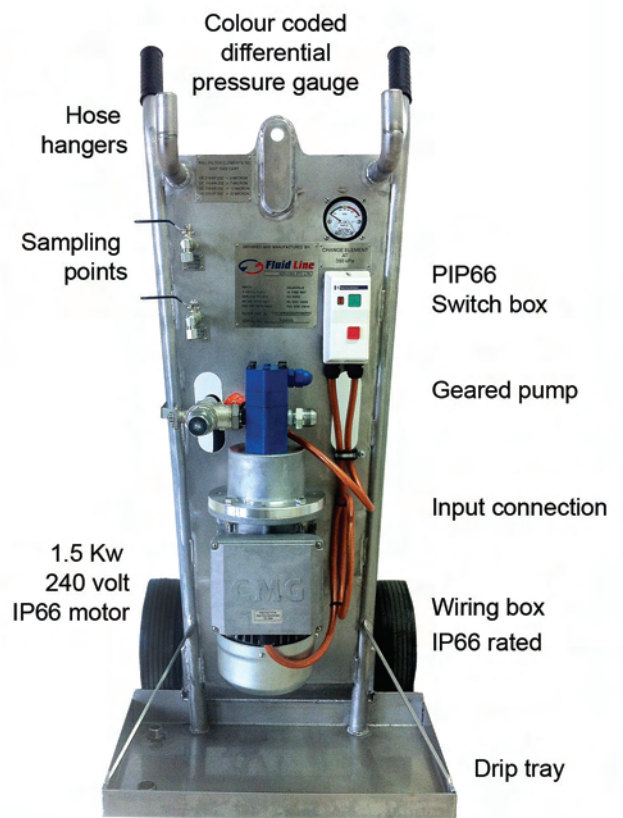

FEATURES

- > Filter cart trolley manufactured from 316 Stainless Steel
- > Bypass valve to isolate filter when pumping contaminated oil to waste.
- > Upstream and downstream sample points.
- > Full size drip tray
- > Hose storage facility
- > Certified lifting point
- > Colour coded differential pressure gauge
- > Pump has built-in safety relief valve

OPTIONS

- > Other displacement pumps are available, with flows up to 33 LPM (at 1450 RPM)
- > Larger filter assemblies are available upon request.
- > Suction and delivery hoses can be supplied to customers specification

Built-in hose storage hangers
